	ر ه	. 64 (6)
	SBC Privacy Manager Patent	XYZ Telecom Privacy King
25	Suspending the call if caller ID information is not required	The Privacy King service determines that caller ID information is not recognized and does not ring the destination phone
8	Recording the name of the caller	The Privacy King plays a message to the caller prompting him or her to record their name
\$	Ringing the destination telephone and playing the recording of the caller's name	The call is then placed to the called party. Before the caller is connected, the called party is played the recorded name and given the opportunity to accept or reject the call.

FIG. 4
